**Period for Reply**

**A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM  
 THE MAILING DATE OF THIS COMMUNICATION.**

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

**Status**

- 1) Responsive to communication(s) filed on 01 March 2004.
- 2a) This action is FINAL.                    2b) This action is non-final.
- 3) Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

**Disposition of Claims**

- 4) Claim(s) 22 and 23 is/are pending in the application.
  - 4a) Of the above claim(s) \_\_\_\_\_ is/are withdrawn from consideration.
- 5) Claim(s) \_\_\_\_\_ is/are allowed.
- 6) Claim(s) 22 and 23 is/are rejected.
- 7) Claim(s) \_\_\_\_\_ is/are objected to.
- 8) Claim(s) \_\_\_\_\_ are subject to restriction and/or election requirement.

**Application Papers**

- 9) The specification is objected to by the Examiner.
- 10) The drawing(s) filed on \_\_\_\_\_ is/are: a) accepted or b) objected to by the Examiner.  
 Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).  
 Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

**Priority under 35 U.S.C. § 119**

Claims 22 and 23 are presented for examination.

Applicants' preliminary amendment and information disclosure statement filed March 1, 2004 have been received and entered.

***Claim Rejections - 35 USC § 112***

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 22 and 23 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 22 is rendered indefinite because the second component (b) states "a pharmaceutically effective amount of a PTPase inhibiting compound of claim 1". Note claim 1 was cancelled in the preliminary amendment dated March 1, 2004.

Claim 23 is rendered indefinite to the extent that it incorporates the above terminology.

The applicants may wish to amend claim 22, by inserting in component (b) the formula of the PTPase inhibiting compound.

Claims 22 and 23 are not allowed.

***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

Art Unit: 1614

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

Claims 22 and 23 are rejected under 35 U.S.C. 103(a) as being unpatentable over Timmins et al. (WO 99/29314) of PTO-1440 in view of Wrobel et al. (WO 99/61435A1) of PTO-1449.

Timmins et al. teach salts of the antidiabetic agent, metformin, a biguanide agent), may be employed alone or in combination with other antihyperglycemic agents, such as glyburide or glipizide, for treating diabetes. Note particularly Example 5, combination of metformin fumarate and glyburide; and Example 7, combination of metformin fumarate and glipizide. Note the antihyperglycemic agents (sulfonylurea agents, glyburide or glipizide) combined with the salts of

metformin, are the same agents that are optionally used in the applicants' instant composition. Clearly, the cited reference teaches an antidiabetic agent, the salts of metformin, can be combined with other agents used to treat diabetes is old and well-known in the art.

The instant invention differs from the cited reference in that the cited reference does not teach the addition of a PTPase inhibiting compound of formula I. However, the secondary reference, Wrobel et al., teaches or disclosed benzothiophene, benzofurans, and indoles useful in the treatment of insulin resistance and hyperglycemia. Note page 55, lines 1-8 states the PTPase inhibiting compounds are useful in the treatment of type II diabetes and in the modulating glucose levels in disorders such as type I diabetes. Clearly, the secondary reference teaches the instant PTPase inhibiting compounds are well-known antidiabetic compounds. Obviously, one skilled in the art would have expected or assumed the combination of the individual antidiabetic agents into a single composition would give an additive effect in the absence of evidence to the contrary.

Claims 22 and 23 are not allowed.

The references listed on the enclosed PTO-892 are cited to show the state of the art.
